SUMMARY

Computer Science graduate with a Bachelor's degree and strong skills in full-stack web development using JavaScript (React, Node.js) and Python. Experienced in building responsive web applications, APIs, and working effectively in agile teams. Known for adaptability, problem-solving, and delivering efficient software solutions.

TECHNICAL SKILLS

Programming: Python, JavaScript (Node.js, Express.js, React)

Security Testing: VAPT (Web, Mobile, API), Penetration Testing Basics, OWASP Top 10

Networking: Knowledge of TCP/IP, OSI Model, Secure Protocols

Web Development: HTML, CSS, RESTful API Development, Real-time Data Handling

Database Management: MongoDB, MySQL

Software Development: SDLC, API Development, Agile Methodologies

Version Control: Git & GitHub

EDUCATION

B.E. in Computer Science and Engineering (CGPA: 8.04) 2021-2025

KNS Institute of Technology, Bengaluru

Pre University in PCMB (89%) 2019-2021

Alva's Pre-University College, Mangalore

Secondary School (90%) 2018-2019

Annie Beasant Convent and High School, Bengaluru

INTERNSHIP

CLOUDISIAN (NSDC Internship) – Application Developer (Web & Mobile) June 2025 - Aug 2025

- Built the Cloudisian website using React & JavaScript, improving performance by 35%.
- Delivered dynamic UI components based on client requirements.
- Collaborated in an agile team, enhancing deployment speed by 25%.

ROOMAN TECHNOLOGY - Application Development (Web & Mobile) Sep 2024 - Feb 2025

- Developed web and mobile applications using MERN stack and other modern front-end/back-end technologies.
- Built a real-time chat application with Socket.io, reducing message delivery latency by 45%.
- Improved API performance and database efficiency, enhancing real-time data handling reliability.

Indian Tech-Keys - Smart System Design using Python and Android App Oct 2022

- Designed user-friendly interfaces for seamless interaction.
- Implemented automated alert systems for critical event notifications.

PROJECTS

GDPR Compliance Checker & Automated Privacy Policy

- Built a GDPR compliance analysis tool using Python and NLP, reducing manual compliance review time by 70%.
- Scanned and processed privacy policies, automatically flagging non-compliant practices with 90% accuracy.
- Generated automated privacy policies tailored to data handling practices, improving policy drafting efficiency by 60%

Twitter Clone

- Developed a Twitter-like social media platform with essential features such as account creation, tweeting, following users, likes, and comments.
- Built using Python and Django, focusing on both front-end and back-end components.
- Integrated real-time updates and authentication system, reducing login response times by 40% and ensuring secure data storage.

Amusement Park Management System

- Developed a user-friendly application for scheduling and managing amusement park visits.
- Integrated MySQL for managing visitor records and bookings.
